EXAMINER'S AMMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The amendment has been changed following:

In claim 1, line 14, "first prevailing volumetric efficiency value" has been changed to -- first actual volumetric efficiency value--.

Inventorship

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Allowable Subject Matter

3. Claims 1-9 are allowed.
4. The drawings filed on 02/28/2006 are acceptable.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including first, determining a reference volumetric efficiency in advance, thereafter determining a first actual volumetric efficiency value from a first measured value at a first measurement point in a first rotational speed range in which a change in the flow losses in an intake tract has only a minor effect on the volumetric efficiency; determining a second actual volumetric efficiency from a second measured value at a second measurement point in a second rotational speed range which is greater than the first rotational speed range in terms of rotational speed, correcting the second actual volumetric efficiency value based on first actual volumetric efficiency and determining change in volumetric efficiency the reference volumetric efficiency and the corrected second actual volumetric efficiency value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of U.S. Patent are not provided pursuant to MPEP 1302.12.
